PREVIOUS PRACTICE

A PARADIGM SHIFT

in SAFETY HEALTH WELLBEING

CURRENT PRACTICE

Designed in cooperation with a working mine for Miners. Rockshield Workstation is a new patented overhead hydraulic safety canopy with a unique shock-absorption system for the man-baskets, designed to protect the worker from the impact of a rockfall.

Rockshield's Safety canopy system protects Miners at the working face should a rockfall occur during scaling or charge up operations, whilst the impact absorption system significantly reduces vibration sustained by the Miner due to impact on the canopy from a controlled or uncontrolled rockfall.

Rockshield reduces the number of injuries and fatalities to Mine Workers during the scaling operation in underground mines. It was designed with the Miner's safety and welfare at the centre of the design process.

Rockshield is fully retractable to allow ease of transport and is easily deployed into the overhead position. It is easily operated with Manual Controls and has variable height selection.

"Engineering a **Safer Future**, now operating as standard practice at **Zimplats Mining Zimbabwe**"

The cantilevered design of the canopy allows 360 degree accessibility and visibility during the scaling and inspection operation.

The Rockshield Workstation's Basket is a robust and versatile basket, ergonomically designed and built to withstand demanding mining conditions, with incorporated safety features. It can be used as a standard utility basket for service work when the canopy is retracted.

The versatile bolt-on quick-fit Attachment Bracket is designed for flexibility which allows it to be fitted to various machines.

Uses...

- Check scaling, before & after bolting
- Inspection, Maintenance & Service work
- Rock Bolt Pull Testing
- Charge up
- Geological, Geotechnical & other inspections
- Mine Rescue Operations

Zimplats Management Team ensuring a safer future for Miners.

Rockshield Workstation will prevent injury, save lives and inspire a far-reaching and enduring philosophy of care in the mining companies and communities where it is deployed.

Having worked closely with management and miners, we understand what is required to ensure the safe and successful deployment of Rockshield Workstation into your Mine.

The introduction of Overhead Protection changes the safety mindset of the Miner, and needs to be carefully planned and managed.

We have developed a specific Training Programme to accompany the introduction of our machine into your Mine.

Acceptance by the workforce of Rockshield's Philosophy of Protection and Care is critical to the success of the Rockshield Workstation, and its adoption will raise safety awareness and demonstrate your commitment to zero harm. This will give you an improved mining cycle with better efficiencies.

Engineered for the Safety, Health and Well-being for the Man in the Basket.

Training Program for Miners

Freedom beyond fear, freedom from my past, freedom from my imaginary future, freedom to live in the present moment - NOW

THE MINERS GUIDE TO INNER FREEDOM AND SAFETY

- **What is common to every accident that occurs?**
 - They all happen in the present moment (NOW)
- **Where does the miners attention need to be to prevent an accident?**
 - In the present moment (NOW)
- **What needs to be considered?**
 - understand the potential energy of falling rock (Impact Awareness)
 - Awareness of inner activity of his mind and his outer physical behaviour.
- Understanding what takes away his attention from the present moment
- Observing his thoughts about the past and the future (the internal dialogue)
- Maintaining full attention to the current task
- The need to understand the emotions he has experienced and how they can influence both his behaviour and performance .
- Being aware of his thoughts & emotions is the key to inner freedom
- Understanding the inner conflict with himself
- **Exploring these issues will provide a foundation for a safe & healthy workforce both at home and at work ensuring a profitable mining operation.**

A philosophy of Protection and Care - where everybody matters

Rockshield Workstation is available to the Mining Industry in the following ways;
Direct order: **Datasky Investments PL, Stand 798 Lot 5, Good Hope, Harare, Zimbabwe.**
Also available for International manufacture under licence from **Rockshield Workstation Ltd.**

THE ROCKSHIELD HUMAN EVOLUTIONARY PROGRAM

The Rockshield Program touches many people in a very unique and different way. We are all unique human beings. We all see and experience the world through our senses and perceptions, conditioned past and current mental and emotional state, which is in a constant state of flux. With this program we gain freedom **from** the mind.

Becoming aware of the turmoil we generate, we discover a new way to live on this earth; Within that journey are processes and practices for recognising and dissolving unresolved emotions that play a huge part in how we live our lives. It reduces inner conflict and conflict in all aspects of our lives.

INDUSTRY ENDORSEMENTS:

"Engineering at its finest, from thought process to product completion. Full dedication and excellence throughout your product's journey".

Phil Jackson, Mine Captain,
The Lisheen Mine Ireland.

PROGRAM ENDORSEMENT:

"Since practicing this program I have gained such freedom, freedom from my thoughts and emotions, freedom to be me. Such a weight lifted from me. My family has also benefited from my experience. I couldn't recommend it enough. Thank you for this precious gift."
Karen, Ireland.

Tried and tested, patented and CE certified.
